Islamabad, Pakistan

PROFESSIONAL SUMMARY

Data Scientist / ML Engineer experienced in building scalable ETL pipelines and production ML systems, specializing in cloud environments and large-scale data processing. Delivered impactful solutions that enhanced model performance and streamlined decision-making processes through statistical analysis and machine learning techniques. Focused on collaboration and adaptability to drive data-driven insights and foster innovation in fast-paced settings.

TECHNICAL SKILLS

Programming, Tools & Automation::

Python • SQL • Bash • Selenium • Jupyter • Colab • Cursor • VSCode • DBeaver • Workbench • Jira

Databases & Data Storage::

Database Design • Data Lake • Data Warehouse • Vector Databases • PostgreSQL • MySQL • MongoDB • Redis • ChromaDB • Amazon S3 • Amazon Athena • Amazon Redshift • BigQuery

Data Engineering::

ETL • Reverse ETL • Apache Airflow • Apache Kafka • Feature Engineering • Batch Processing • PySpark • Databricks

Cloud, DevOps & Infrastructure::

AWS • AWS Lambda • AWS CloudWatch • Azure • Azure Functions • Docker • CI/CD • GitHub Actions • Git • Linux • MLflow • Model Deployment • Model Monitoring • Model Versioning

Machine Learning & Statistics::

Scikit-learn • PyTorch • TensorFlow • Keras • XGBoost • Gradient Boosting • PCA • Probability • Neural Networks • NLP • Model Evaluation • MLOps

Generative AI & Agentic Systems::

Large Language Models (LLMs) • Prompt Engineering • RAG • LangChain • Agentic AI • AI Agents • Model Context Protocol (MCP) • Embeddings

Analytics & Visualization::

Pandas • Tableau • R-Shiny • Matplotlib • Seaborn • Excel • Google Sheets • Pivot Tables • Data Mining • Statistical Data Analysis • A/B Testing

Web & API Development::

Web Scraping • Django • FastAPI • GraphQL • SQLAlchemy • Pydantic • Alembic • Celery • Pytest • Postman

WORK HISTORY

Python Data Scientist @ Turing

Remote (USA) | Nov 2023 - Current

- Improved model accuracy by 22% using advanced feature engineering.
- Enhanced, evaluated, and reviewed large language model (**LLM**) through prompt engineering techniques, reducing LLM error rate by 35%
- Designed and maintained multiple **ETL pipelines** using **Apache Airflow, Python, and SQL**, processing ~5M+ records daily
- Eliminated repetitive data processing tasks using **Python scripting**, which reduced manual effort by 40%.
- Partnered with **cross-functional teams** (engineering, product, and business) to convert data insights into actionable product and strategy improvements.
- Optimized existing **data pipelines** for scalability and performance, enabling faster iteration cycles for the data science team.

Data Engineer (Freelance) @ Medusa

Remote (USA) | Jun 2023 - Feb 2024

- Built and managed **ETL** processes on **AWS** using **Redshift, Athena, and MySQL** within containerized **AWS Lambda functions** running on **Docker**.
- Integrated with existing **CI/CD** pipelines via **Bitbucket** to enable automated, reliable code deployment workflows.
- Deployed **Docker** images to **AWS** infrastructure and monitored system performance and health using **AWS CloudWatch** dashboards and alerts.
- Implemented **reverse ETL pipelines** for Monday.com using **GraphQL API** integration, enabling seamless bi-directional data synchronization.

Data Scientist @ LoveForData

Karachi, Pakistan | Jan 2023 - Nov 2023

- Designed and implemented end-to-end **ETL workflows orchestrated with Apache Airflow**, integrating **Apache Kafka** for real-time data ingestion into a centralized data warehouse.
- Performed exploratory data analysis (**EDA**) using **Python and SQL**, identifying key business patterns and trends that guided strategic decisions.
- Built and deployed predictive **machine learning models using scikit-learn and PyTorch**, improved recall from 55% to 73% while maintaining constant precision for a default prediction model

Data Analyst @ LoveForData

Karachi, Pakistan | Jan 2021 - Dec 2022

- Developed **Django**-based web applications for interactive data visualization and self-service analytics, increasing stakeholder data accessibility by 50%
- Built and deployed a Python-based **ETL pipeline on Azure Functions**, enabling **serverless**, scalable data processing on the **cloud**.
- Applied **market basket analysis** (association rules) to a restaurant client's transaction data, generating actionable insights that improved menu design, marketing strategy, and customer experience.
- Developed multiple production-grade **web scraping** solutions in Python to automate data collection from external websites.
- Shipped a forecasting model, supporting data-driven planning and operational decisions.

Junior Data Analyst @ LoveForData

Karachi, Pakistan | Apr 2019 - Dec 2020

- Performed comprehensive **data audits** to identify and correct data quality issues, reducing data entry errors by 25% across 5 client databases.
- Built an interactive, real-time dashboard using **R-Shiny** for data visualization and exploratory analysis, enabling stakeholder self-service reporting.
- Developed data workflows to extract, transform, and load data from multiple heterogeneous sources into a structured data warehouse.

Data Science Trainee @ LoveForData

Karachi, Pakistan | Oct 2018 - Mar 2019

- Automated data extraction from 20+ external websites daily.
- Developed an **NLP** pipeline supporting sentiment analysis, text summarization, and question answering using Python-based NLP libraries.

Data Science Intern @ LoveForData

Karachi, Pakistan | Aug 2018 - Sep 2018

- Collected, cleaned, and structured datasets.

CERTIFICATIONS & LANGUAGES

- Certifications:** 50+ certifications in Python, Bash, R, SQL, Excel, Tableau, Machine Learning, Data Engineering, Linux, and Statistics. (Visit the [portfolio](#) for full list).
- Languages:** English (Fluent), Urdu (Native), Arabic (Conversational).
